

Case Study

Bridge Abutment Protection

Product:	Terrafix T45 concrete blocks
Client:	Vic Roads
Project:	Tallarook Bridge works
Engineer:	Vic Roads
Contractor:	North Vic Roads
Date Constructed:	2001

In this instance, the T45 structure was constructed at a 1:1 slope. The T45 block system has been used for several hundred bridges in Australia for abutment protection. Its proven track record over several decades has encouraged many Councils and Highway Departments in Qld, Nsw & Vic to specify T45 as their preferred product for protecting bridge abutments.
